Randomised Conversation Trials (RCT)

Professor Julia Verne. Public Health England

Randomised Conversation Trials (RCT)

Connecting people at random

Meet people you normally don't come into contact with

Breaking silos

No particular agenda or goal

Methodology

- Random matching- Look for new people with same colour on a different table
- 4 minutes each to talk about..... research.... your role.....anything
- When bell goes- switch to another table and match with someone else with same colour
- Start a new conversation- 4 minutes each
